

NEW

REMAN PROGRAM

Remanufactured hydraulic pumps for your concrete pumping equipment.

GET THE MOST OUT OF YOUR EQUIPMENT WHILE MINIMIZING MAINTENANCE AND COSTS

A Brundage-Bone reman hydraulic unit can help minimize downtime and save you money. The Brundage-Bone reman exchange program is not just a process where a component is simply repaired, but instead a process where a component is thoroughly inspected inside & out and completely restored to its original new specifications. Worn parts are replaced with new, then each unit is tested and set to OEM specifications before it leaves any of our facilities. ***And rest assured, each unit carries an industry leading 18 month warranty* on parts and workmanship.***

CONTACT US AT 1-800-914-6141 FOR PRICING AND AVAILABILITY.

* Warranty coverage is 18 months from date of purchase, 12 months from date of install.

BRUNDAGE-BONE REMAN

HOW IT WORKS

The heart of the Brundage-Bone reman program is based on a reman exchange setup. This means that you place an order with Brundage-Bone for a remanufactured unit – the price you pay is a core charge in addition to the price of the reman unit. The core charge is then refunded back to you once you ship your old core back to us and we've inspected it and determined it acceptable based on our flexible core criteria*.

** Core refund criteria can vary by component and are subject to change.*

1. PURCHASE A REMAN UNIT

Place an order for a reman unit based upon component manufacturer, model number, serial number, etc. The price will include a core charge in addition to the price of the reman unit.

2. SEND BACK YOUR OLD CORE

As soon as you receive your new reman unit, ship back your old core/component (assembled) with regulators intact.

3. RECEIVE A REFUND

Once your core arrives we will then inspect it per our core criteria and issue you a refund.

KEEPING YOU UP AND RUNNING

When your equipment is down and needs service, you need a fast dependable solution that can get you back up and going quickly, affordably and reliably. That is exactly what the Brundage-Bone reman program is here for – to provide lower-cost reliable solutions. We specialize in the components that are used on your equipment, so we can get you back up and going quickly.
