

Series 2320 Concrete Placement Hose

Series 2320 "Mud-Snake" is the newest hose in the innovation program of Brundage Bone Concrete Pumping. The development was initiated to answer a need in the North American market for a hose that was exceptionally easy to handle and was the ideal answer for ICF forms as well as tall walls and columns where space is minimal. This is all achieved thru its lay flat design which allows better flow control and lower placement rates when necessary.

Series 2320 "Mud-Snake" is a lay flat hose made from extruded thermoplastic polyether based polyurethane (TPU) with excellent wear & tear characteristics. The circular woven reinforcement is made from an extra strong yarn. The "extrusion through the weave" production method gives a very strong bond between cover and lining, and encapsulates the woven reinforcement.

The heavily reinforced weave ensures minimum extension in length and minimum "snaking" or bending of the hose.

Features & Benefits

- Meets/Exceeds CPMA Requirements
- 1/3 the Weight
- Operator Friendly
- More Consistent Flow at Lower Placement Rates
- Ease of Pour in Tight Areas
- Bright Color for Visibility and Safety
- Superior Resistance to Weather and Aging
- Easily Cleans Up

Part Number	I.D.		Wall Thickness	W.P.	Burst	Weight w/o Concrete	Weight w/ Concrete
	in	mm	in	psi	psi	lbs/ft	lbs/ft
2320-400	4	111.0 + 2.0	0.16	1250	2500	1.28	14.38
